

REMARKS

By way of the present communication, applicants have amended claims 1 and 4 as suggested by the Examiner. That is, by using the word "sealingly" instead of the word "sealing" and by correcting a typographical error by changing the word "at" to "is" where suggested by the Examiner. Therefore, it is requested that the Examiner's objections to claims 1 and 4 be withdrawn.

Claim 1 has been rejected under 35 U.S.C. 102(b) as being anticipated by Miller (U.S. Patent 2,692,564). The Examiner believes that the instantly claimed housing, inlet port, outlet port, and injector are shown in Miller. Applicants have canceled claim 2 and included its limitation into claim 1 with respect to the injector being rotatable 360° within the horizontal plane defined in the claim. Therefore, it is respectfully requested that this rejection be withdrawn.

Claim 3 has been rejected under 35 U.S.C. 103(a) as being unpatentable over Miller. The Examiner believes it would have been obvious to one having ordinary skill in the art at the time the instant invention was made to have used stainless steel as the construction material.

Applicants request that the Examiner withdraw this rejection in view of the amendment made to Claim 1 that now requires that the injector be 360° rotatable.

The Examiner has indicated that claims 4-6 are allowable and has suggested that claim 1 would also be allowable if the limitation of claim 2 was included in claim 1. Applicants acknowledge the allowability of claims 4-6 and have canceled claim 2 and incorporated its limitation into claim 1.

Applicants' attorney notes that prior art has been made of record but has not been cited against the instant claims.

In view of the above, it is applicants' position that the claims, as now presented, define a patentable invention over the art. Therefore, applicants request that the Examiner pass this application to allowance.

Respectfully submitted,

By 

Henry E. Naylor, Reg. No. 27,461
